The definite integral of from to , denoted  $\int_a^b f(x) dx$ , is defined to be the signed area between and the axis, from to . Both types of integrals are tied together by the fundamental theorem of calculus. This states that if is continuous on and is its continuous indefinite integral, then  $\int_a^b f(x) dx = F(b) - F(a)$ . This means  $\int_a^b f(x) dx$  is sometimes an approximation to a definite integral is ...

### Integral Calculator: Integrate with Wolfram|Alpha

We have looked at the definite integral as the signed area under a curve. This lets us compute total profit, or revenue, or cost, from the related marginal functions. We have looked at a number of applications where this was interpreted as an accumulation over time, including total production of an oil well and present value of a revenue stream. For some applications we want to look at the ...
