Make Manual Transmission Car

A car needs a full working transmission (or gearbox) in order to allow the vehicle to change gears, but the inner workings of a vehicle differs greatly between a manual transmission car and an automatic transmission car. A manual car is recognisable from the inside, as it contains a clutch pedal, which is used to change gears, as well as a gear shift stick between the two front seats, which ...

Manual vs. Automatic Car Transmission: Which is Best?

Driving a manual transmission car can seem a little daunting at first, but once you get used to it, shifting gears will be second nature. Before you practice shifting, make sure you memorize the shifting pattern on the stick. To upshift, you'll need to accelerate until your engine reaches between 1,500 and 2,000 RPMs. At this point, you'll hear the engine pitch change and you'll know it ...
