Renault Espace F1 Engine

The engine and transmission allowed the Espace F1 to accelerate from 0–100 km/h (0–62 mph) in 2.8 seconds, 0–200 km/h (0–124 mph) in 6.9 seconds and carry on accelerating to a top speed of 312 km/h (194 mph).

Renault Espace - Wikipedia

The Renault Espace F1 – the world's fastest MPV – surely ranks as the most outlandish of these machines. In the mid-nineties Renault was looking for new ways of using its hugely successful F1 engine programme to promote its road cars. The French manufacturer hit on an inspired idea.

Renault Espace F1: The 197mph MPV - F1 Fanatic

They could have just painted the Espace in Renault's racing colours and glued a few bits and pieces on, but no – the French company commissioned its Espace production partner Matra to make one of...

Concepts that time forgot: the Renault Espace F1 | Top Gear

The engine was straight out of a World Championship-winning Williams, a 3.5-liter, 40 valve Renault V10 producing some 800 BHP, and driving the rear wheels through an F1-spec transmission. Only driven by a select few Formula One drivers, the Espace F1 could annihilate the 0-60 mph run in less than three seconds.

Renault Espace F1 | Gran Turismo Wiki | Fandom

Powering the Espace F1 was an 800 hp (upgraded from its original rating of 700 hp) 3.5-litre, 40-valve Renault RS5 V10 engine, as used in the 1993 Williams-Renault FW15C. Renault Espace F1 1995 (when renaul can) + Assetto corsa ...

Renault Espace F1 Engine - auto.joebuhlig.com

197 miles per hour, 0 to 60mph in 2.8 seconds and nearly 800HP - In a minivan! This is the Renault Espace F1. How did Renault create it? How much of the original Espace is left? And why did it tend to 'hop' around the corners? Subscribe for more incredible motorsport: goo.gl/AbD2f9 FW14B Heel Tread Socks! bit.ly/FW14BSocks Lotus 97T Heel Tread Socks! bit.ly/97TSocks In 1994, Renault were ...

The Incredible Family Car with an F1 Engine

Renault F1 Engine Specs F1 Engine Specs 2020: Formula 1 engines form the heart of the cars, and we take a look at the power the current F1 cars carry. The performance of a Formula 1 car is measured in terms of power, which is measured in watts. Watt is simply the rate of energy transferred in a unit of time.
